Short Courses

▶ **Begin with MAYA** (3 sessions / 3 hrs per session)
[Pre-requisite – Not Applicable]

This is a beginners' forage into Maya - a high-end 3D computer graphics and 3D modeling software package. Participants are introduced to the user interface and acquire an understanding in the basic usage of the software by applying basic tools to create simple 3D models. This workshop is aimed at giving the beginner a quick grasp of using MAYA and serves as a sound pre-requisite for the participants' continuation into more intermediate or advance courses in the Art of 3D Modeling or Animation, Character Animation, Z-Brush, etc, that are offered in our Professional Short Courses.

▶ **Principles of Animation** (3 sessions / 3 hrs per session)
[Pre-requisite – Not Applicable]

Applicants who want to hone their Animation skills or interested in acquiring knowledge in the art of 2D or 3D Animation should first learn the basic Principles of Animation. This course brings applicants through the 12 Principles of Animation. This workshop aims to give the beginner an overview of the basic animation principles and serve as pre-requisite for the participants' continuation into more intermediate or advance courses in the Art of Animation; 2D Animation, 3D Character Animation, Voice Acting for Animation, The Animator as Actor, etc, that are offered in our Professional Short Courses.

- Each Short Course above is now at \$200*. Limited seats available so book before 30th October 2008.
- Group registration of 5 or more participants, can enjoy a further 20% discount on the promotional price.

- All course fees are subjected to prevailing GST.
* Promotional **50% discount** for all *scape participants.

▶ **Digital Art** (3 sessions / 3 hrs per session)
[Pre-requisite – Basic Drawing & Adobe Photoshop Skills]

The course covers the usage of the Wacom Pen at the same time honing the applicants skills in its use for Digital drawing, painting and basic compositing of 2D layers using Adobe Photoshop. The module touches on basic principles of lighting, scale, perspective and color theory. This workshop aims to give the beginner an overview of the usage of Digital Artistry in the creation of "virtual sets" and "digital backlots". This workshop serve as pre-requisite for the participants' continuation into more intermediate or advance courses that are offered in our Professional Short Courses.

▶ **Video Shorts** (3 sessions / 3 hrs per session)
[Pre-requisite – Not Applicable]

This is a basic video production workshop where applicants learn video-graphy through the use of their cell phones or digital cameras to create short experimental narrative videos for web delivery (e.g. YouTube). Students work in groups to develop a story, shoot video, edit footage and upload their videos to the web. This workshop aims to give the beginner an overview of video production and basic video editing. Applicants who have completed this workshop gain pre-requisite into our more intermediate or advance courses like Concept of HD Video Production and Video Editing offered in our Professional Short Courses.
